

PaSSPort

Managed Data Services for Financial Data Management.

Eliminate Complexity and Reduce Data Costs.

Financial institutions today are faced with an increasingly complex and costly data world.

As financial data continues to grow in both volume and complexity, so do the associated risks of poor data quality, inadequate data controls, and lack of easy access to data sets. As an expert in financial data management, we recognize the unique data management challenges that financial organizations face today, and that's why we have developed our data-as-a-service solution, PaSSPort.

WHAT IS PASSPORT?

PaSSPort is our cloud-based managed data service, offering a simplified, low cost approach to data management by eliminating the day-to-day burden of data processing and platform maintenance. It takes our award-winning financial software suite and combines it with our global team of dedicated service associates. The result, a rapidly deployable data management solution that enables firms to focus on their core revenue-generating activities knowing that an entire firm of focused data management specialist is handling their operational challenges and data requirements.

SIMPLE AND HASSLE FREE

PaSSPort connects you to over 35 global data vendors by leveraging our fully maintained data feed library. By ensuring the reliability of the data feed, and by offering unparalleled access to the industry's largest range of data feed interfaces, PaSSPort insulates your operations from continual changes.

When your data is ready to be delivered PaSSPort leverages our data delivery solution to ensure your data is distributed to the users who need it – whether that be risk applications, regulatory reporting or core trading systems.

MANAGING YOUR PASSPORT MANAGED DATA SERVICE

For complete transparency, PaSSPort includes a web-based data operations platform for managing and monitoring your service.

It displays a live view of your data including acquisition, distribution, and delivery to downstream applications - each with full data lineage capabilities and summary information on completed and running processes. Supplementary to monitoring, PaSSPort provides a range of reports and metrics that allow you to control your data and monitor usage. And in just a few clicks you can also seamlessly make changes to your service such as opting for new data sources, modifying delivery frequency or connecting new downstream applications.

LET'S GET STARTED

Whether you are concerned about responding to increased regulation, looking to source additional data effectively, or want to improve the efficiency of operations and cut costs, PaSSPort can help your business. It's fully hosted and maintained managed data service ensures a lower total cost of ownership and provides a superior return on investment – allowing you to focus on your core competencies while relying on us to focus on ours.

Why PaSSPort?

OPTIMIZE DATA COSTS

PaSSPort helps to tightly track and control the costs associated with data sourcing to prevent duplicate costs and unnecessary fines for inappropriate usage.

ENHANCE OPERATIONAL EFFICIENCY

PaSSPort increases operational efficiency by reducing manual effort of acquiring data and onboarding new instruments and fields.

REDUCE OPERATIONAL RISK

PaSSPort is a cloud-based solution fully managed by our global team of industry experts providing 24/7 support.

LOWER FOOTPRINT

PaSSPort is a cloud deployed managed data service that easily integrates with market data platforms to seamlessly configure the instrument universe and fields as well as distribution requirements.

EASE OF USE

PaSSPort offers an intuitive user interface to browse current or historical data or define new attributes requested by instrument or asset class.

UNPARALLELED INSIGHT

PaSSPort monitors vendor request statistics to ensure SLA's are being met.

INDUSTRY STRENGTH

PaSSPort utilizes Alveo's market leading data quality software solution, trusted globally to address market and reference data management challenges and support regulatory compliance.

THREE EASY STEPS TO ONBOARD A CUSTOMER:

CLIENT PICKS A DATA SOURCE

CLIENT PICKS FROM A LIBRARY OF VALIDATION RULES AND DATA CONSUMPTION OPTIONS

ALVEO INITIALIZES THE DATA HUB ENABLING SELF-SERVICE DATA DISTRIBUTION

ABOUT ALVEO

Alveo is the leader in market data integration and analytics solutions for financial services. Focused on optimizing data flows for business user self-service, we provide cloud-native data aggregation and data quality management that enables clients to easily access trusted data while maximizing their data ROI.

Through our managed services, we ensure that clients can smoothly onboard, prepare and validate data for use in operations, trading, investment management, pricing, risk, reporting and machine learning.

We service a global client base and our award-winning technology provides easy integration into business user workflows and a proven platform for advanced analytics. Through combining deep domain expertise with latest open-source technologies, we help financial institutions ensure high quality data, optimize market data cost and maximize productivity.
